-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### **DETAILED ACTION**

1. The indicated allowability of claims 1-20 is withdrawn in view of the newly discovered reference(s) to Duttlinger (US Patent 4,284,450) and Gallentine (US Patent 5,609,715). Rejections based on the newly cited reference(s) follow.

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Duttlinger (US Patent 4,284,450).

Duttlinger discloses a method and device for repairing bicycle tires. As shown in the figures, a needle 14 is inserted through tire 10. Cement is deposited in the inside of the tire from tube 12 through lateral orifice 16 and end orifice 18 of needle 12 forming a relatively wide deposit 24. At col. 3, lines 30-34, Duttlinger discloses that the tire is then maintained under moderate pressure while the cement is allowed to dry or set (i.e. cure).

#### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1734

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Duttlinger as described above in paragraph 3 in view of Gallentine (US Patent 5,609,715).

Gallentine discloses a tire puncture repair system operable upon a damaged tire in situ. As shown in the figures, this system includes probe 50, which injects bonding fluid 78 onto the inner surface 70 of the tire. As the probe 50 is withdrawn from the tire, drive rod 82 forces bonding fluid within probe 50 to fill and seal the course of the puncture in the body of the tire between the casing interior and the exterior of the tread. This completely seals the puncture when the probe is removed (see col. 6, line 66 through col. 7, line 7).

It would have been obvious to one having ordinary skill in the art to apply bonding fluid to fill the puncture vacated by the probe, as taught by Gallentine, in the method and apparatus of Duttlinger in order to completely seal the puncture when the probe is removed.

#### ***Allowable Subject Matter***

6. Claims 2 and 5-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claims 8-20 are allowed.

***Telephone/Fax***

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Sells whose telephone number is (571) 272-1237. The examiner can normally be reached on Monday-Friday between 9:30 AM and 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Crispino can be reached on (571) 272-1226. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
